

FLEA CONTROL GUIDE

Protect Your Pets and Your Home

NO QUICK FIX!

There is **NO** one-time treatment that eliminates fleas. The best defense is monthly flea prevention for all pets.

For every flea you see, there are hundreds to thousands more in your home.

STEP 1 - Treat ALL Pets

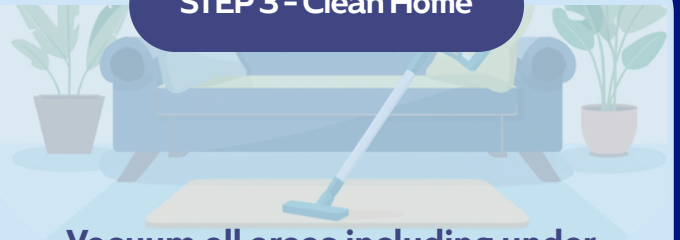

Every cat and dog must be treated. Use vet-recommended products only. Flea collars and Hartz products **DO NOT** work. Flea shampoos stop working once rinsed off.

STEP 2 - Stay Consistent

Treat pets for at least 3 months in a row. Severe infestations may require longer treatment periods.

STEP 3 - Clean Home

Vacuum all areas including under furniture. Empty vacuum bags immediately. Wash all bedding in hot water and dry on highest heat setting safe for fabric.

STEP 4 - Severe Infestation

Severe infestations: use flea sprays, powders, or flea bombs carefully.

STEP 5 - *Repeat*

Repeat all steps for at least 3 months to fully eliminate fleas.
