WHEN SPAY YOUR CAT?

Before that first litter!

Best timing:

- Ideal age: 4–6 months
- Can be done as early as 8 weeks (if healthy)
- Before the first heat cycle is best

Health benefits:

- Lowers risk of mammary cancer
- Prevents uterine infections (pyometra)
- Leads to faster recovery when young

Why it matters:

- Prevents unwanted litters
- Reduces risk of serious diseases
- Helps improve behavior

Important:

- Indoor cats still need spaying
- Talk to your vet for the best timing
